digitalpro mini
professional nail drill set

Registered International Design Nr. EU 007482187;
Dust protection system; Electronic overcharging protection;
Power: 30 Watts; Max speed: 35.000 rpm;
Battery: 2200mAh; Li-ion, 7.4V
Charging time: 4h / Working time: 6h
Handle support and 2 diamond bits included;
Dimensions: 80x140x40mm; Weight: 430g;
ref./cod.
45.300.651

cordless

TECHNICAL ADVANTAGES

- **Protection against dust on the tip:** unlike the vast majority of devices, RickiParodi models have reduced the dust entry zones to the maximum, thus achieving stable operation and superior longevity when compared to equipment in the same segment).
- **Accessory fixing system:** equipped with double bearing to further reduce the exposure to dust accumulation and increasing its useful life (each shaft is tested and calibrated in order to eliminate any vibration in intensive operation).
- **Switches:** the placement of all switches took into account the need for their activation and above all to guarantee their insulation against the entry of dust, so that their operation is not compromised).

FUNCTIONAL ADVANTAGES

- **Speed selector:** with dimensions and texture applied to facilitate the speed selection (it is also the signature of the line, allows perfect control and precision of the speed selection).
- **Switches and connectors:** positioned according to the need for daily use (all switches and connectors have been thought out in maximum detail so that the design does not compromise the ergonomics and the use of the equipment).
- **LCD display:** high contrast blue, allows a perfect reading of the speed, regardless of the ambient lighting conditions.
- **Handle holder:** ergonomic and very practical design.

quick drying UV NAIL DRYER LED LAMP

RickiParodi
beautysolutions

for all types of gel,
UV gel and
LED polish

UViolet UV Nail Led Lamp

Power: 36Watts
Double wavelength: 365nm + 405nm
Allows to work with ALL types of gel, UV gel and LED polish
Automatic sensor and timer

ref./cod.
45.300.009

"always on" function

ergonomic design for hands and feet

dual wavelength LED (365nm + 405nm)

CATALYSIS ALL TYPES OF GEL NAIL POLISH

All LED dots adopt unique technology - double optical wavelength (365nm + 405nm), allowing to work with all types of UV and LED gel coat, Base Coat, Top Coat, Gel Color, Gel Hardener, Builder, Acrylic, Gel of Sculpture, Tail of Gem, etc. There are no brand requirements, universal usage.

HIGH SPEED CATALYST TECHNOLOGY

Dual-wavelength emission offers catalyst speeds up to 2x faster than single-wavelength UV LEDs - complete catalysis takes only 40% of the time of traditional UV lamps.

digital timer 15, 30 and 60"

always on function

AUTOMATIC SENSOR AND TIMER

With intelligent hand detection sensor. Multifunction timer concentrated on a single button.

PORTABLE AND EASY TO USE

Ergonomic and appealing design, lightweight and sturdy construction.

high performance NAIL VACUUM DUST COLLECTOR
